EXPERIENCE

Front End Developer, 10/2022 - Current

Freelance & Volunteering, Dublin, Ireland

Budget App for Family: [React, TS, Next.js, TailwindCSS, PostgreSQL, Firebase Auth, Chart.js]

- Developed a form for adding invoices, allowing selection of multiple users. Improved family budget tracking by enabling recording of expenses for multiple family members.
- Added functionality to edit and delete existing invoices, reducing errors and increasing flexibility.
- Introduced the ability to plan and record future expenses with an "unpaid" status.
- Implemented features to view spending over specific periods and calculate debts between family members, facilitating easy expense tracking and management.
- Chose PostgreSQL for fast data access and seamless program updates.
- Created an archive to view paid and closed bills.
- Integrated Firebase Auth for easy registration and Google account login, enhancing user experience.
- Aiming to add multi-account access to enable individual expense tracking by each family member.

Weather App: [React, TS, Next.js, API, tsParticles, Tailwind]

- Fixed incorrect city searches with the same names in different countries using OpenWeatherAPI and GeoDB, allowing users to choose between cities with identical names across different continents.
- Created an interactive background that responds to mouse movements using tsParticles, enhancing user experience and increasing page engagement.
- Designed and implemented the interface with TailwindCSS, making style application faster and easier.

Tomato Clock: [React]

- Used useReducer instead of useState, reducing code complexity and improving performance by providing better state accessibility.
- Added audio elements and accessed them using useRef to enhance the user experience.
- Implemented logic allowing users to set their desired work intervals and breaks.

Web Designer, 03/2022 - 09/2024

Freelance, Dublin, Ireland

- Designed website layouts and UI kits in Figma for a [Ukrainian music and art studio](#), collaborating closely with front-end developers to enhance usability and user experience.
- Designed logos, icons, images, and banners using Adobe Photoshop and Illustrator, contributing to the overall visual appeal of websites.
- Developed web applications using Vanilla JavaScript, HTML, CSS ensuring clean and efficient code.
- Developed 3+ websites for non-profit organizations, enhancing their online presence and outreach capabilities.

Store Owner (Maternity Clothes), 09/2018 - 02/2022

Self-employed, Ivano-Frankivsk, Ukraine

- Cultivated relationships with customers to promote repeat business. Received many positive reviews and regular customers in a field in which it would seem impossible.
- Maintained records of sales, profits and losses within the store.
- Made purchasing decisions based on customer demand and current market conditions.
- Resolved customer complaints efficiently, ensuring satisfaction and finding compromises in any situation.
